**SA International Announces Successful Completion
of the HP Scitex FB950 RIP Certification Program**

Salt Lake City, UT – April 15, 2009 – SA International (SAi), the leading provider of Solutions for the Professional Sign Making, Large Format Digital Printing and CAD/CAM for CNC Machining Industries, today announced that Flexi 8.6v2 and PhotoPRINT 6.1v2 have achieved RIP (raster image processor) Certification for the HP Scitex FB950 Printer series.

Flexi and PhotoPRINT, two of the industry's leading RIP solutions, have successfully completed rigorous compatibility testing to comply with the HP Scitex FB950 RIP Certification Program, which helps ensure smooth integration with the unique features of HP's printers. The test awards one, two or three stars for factors like printing performance, media support and printer management. Only RIPs that have met the criteria for certification are allowed to use the "Certified for HP Scitex FB950" designation.

To see how Flexi and PhotoPRINT fared in the test, visit

"HP's certification is extensive and challenging, but Flexi and PhotoPRINT were up to the task," said Sarit Tichon, Senior VP of Worldwide Sales and Marketing, SA International. "Achieving certification provides our mutual customers peace-of-mind that their hardware/software combination is compatible and highly productive."

The HP Scitex FB950 prints on wide range of unusual media, including rigid, flexible, thick, heavy or uneven material. The Scitex FB950 is an invaluable tool when creating POP displays and tradeshow and event graphics, all with incredible print quality. The driver for the new FB950 is included in all new packages of Flexi and PhotoPRINT. Users running Flexi 8.6 v1 and PhotoPRINT 6.1 v1 can access the driver free of charge by simply clicking the *Check for Updates* menu option within their software.

About SA International

SAi is recognized as a global leader in providing complete, professional solutions for the sign making, digital printing and CNC machining industries. The Company's solutions help turn creative ideas into reality by providing world-class design and editing tools geared for production. Headquartered in Salt Lake City, Utah, SAi has additional offices in Belgium, Brazil, and Japan.
