**SA International Introduces Paint Protection Templates
on SIGN.com**

Philadelphia, PA – August 5, 2008 – SA International (SAi), the leading provider of Solutions for the Professional Sign Making, Digital Printing and CAD/CAM for CNC Machining Industries, announces the addition of Paint Protection vehicle templates to the SIGN.com Automotive Suite.

Paint Protection vehicle templates are custom configured for thousands of current vehicle models; organized by year, make and model. Transparent paint protection film guards against weathering, gravel, debris and bug damage. These pre-nested templates are meticulously measured to save time and reduce costly waste.

The entire Paint Protection Template CD collection can be purchased through SAI's value-added reseller network, or individual files can be browsed, purchased and downloaded on SIGN.com. Each full-size template is formatted for Flexi 8 and higher.

“The automotive sign business is booming right now and Paint Protection is the perfect jumping point for any sign shop looking to break into this hot market,” states Sarit Tichon, VP of Worldwide Sales and Marketing. “Using their current Flexi software and cutter, shops can expand their business with little extra investment.”

The SIGN.com Automotive Suite now offers Auto Vehicle templates, Paint Protection templates and the Bad Wrap[®] system with even more to come.
