**SA International Announces Tom Penner  
As New EnRoute Software Trainer**

**Philadelphia, PA – June 12, 2006** –SA International (SAi), the leading provider of Software Solutions for the Professional Sign Making, CAD/CAM for CNC Manufacturing, Digital Printing, Proofing and Color Management Industries, is excited to announce Tom Penner as their new EnRoute Software Trainer.

Tom started out his career as a cabinet maker and home builder for 16 years before his involvement in the CNC industry, which he has been actively working in for over 10 years. Before joining SAI, Tom worked for Skarie, Inc., the Mid-Atlantic MultiCam Dealer as the head of training and Tech support for both their hardware and software platforms. During that time he has been integrating EnRoute across a wide range of industries and has been closely involved with the program throughout its development.

In his new role at SAI, he will bring this experience as a Trainer for the EnRoute product line supporting dealers and training end users across the United States. Tom is already working on creating a cohesive and broad ranging training package that will help maintain EnRoute as the premier CNC software product on the market today.

“Bringing Tom on board is another example of SAI’s drive for better customer satisfaction,” states Ran Rosin, Director, CNC Software. “We strongly believe that training is the most important part of product support and is the key element to our success.”

**About SA International:**

SAi is recognized as a global leader in providing complete, professional software solutions from design to production for the sign making, digital printing, and CNC machining industries. The Company’s software solutions help turn creative ideas into reality by providing world-class design and editing tools geared for production. Headquartered in Philadelphia, Pennsylvania, SAI has additional offices in Belgium, Brazil, China, Japan, Puerto Rico, UK and Russia.
