SA International Announces its Addition to the HP Designjet Z6100 RIP Certification Program

Philadelphia, PA – December 17, 2007 – SA International (SAi) the leading provider of software solutions for the Professional Digital Printing, Sign Making and CNC Machining Industries, announces PhotoPRINT 6 and Flexi 8.5's successful completion of the HP RIP certification initiative for the HP Designjet Z6100 Printer series.

The HP Certification Program tested PhotoPRINT 6 and Flexi 8.5 for essential performance expectations when used with the HP Designjet Z6100's embedded spectrophotometer. When used in conjunction with the HP Designjet Z6100, PhotoPRINT 6 and Flexi 8.5 produced accurate, vibrant and consistent color.

"SA International is extremely pleased to have recently participated in HP's RIP Certification Program for the HP Designjet Z6100 Printer series," states Don Feagan, President and COO, SAi. "As a long-term development partner with HP, we continuously look for ways that HP and SAi can improve our products for the sign and digital graphics markets."

"The HP Designjet Z6100 RIP Certification Program has been successful and has certified products from five of the industry's most reputable RIP providers," said Enrique Lores, Vice President and General Manager, Large Format Printing Division, HP. "Through this program, we uphold our commitment to giving customers more reliable choices to choose from. By assuring compatibility of RIPs with the HP Designjet Z6100, we maintain our commitment to the Print 2.0 strategy of delivering digital solutions that enhance the printing experience."

Certification tests for the HP Designjet Z6100 include print quality, productivity and other important characteristics of printer management and job handling. Full details of the compatibility tests and the currently certified solutions can be found at www.hp.com/go/z6100/solutions.

About SA International:
