## **SA International Introduces SAi Color Solutions**

**Philadelphia, PA – March 26, 2008** – SA International (SAi), the leading provider of Software Solutions for the Professional Sign Making, Digital Printing, Proofing, and CAD/CAM for CNC Machining Industries, introduces SAi Color Solutions, the umbrella for a new suite of color management products tailored to the print market, scheduled for release in the second quarter of 2008.

This new Suite includes a spectrophotometer, profiling and color verification software. These modular components can be individually integrated into other packages or combined together to make a complete solution.

The SPRINT™ handheld spectrophotometer features new patented “Wide-Aperture” technology that scans over 600 patches per minute. The SPRINT can scan six adjacent colors in the same time it takes competing devices to scan only one. The “wide mouth” also allows for high motion tolerance, eliminating the need for rulers or guides.

The SNAP™ profiling software features a wizard-like interface that guides users step-by-step through the process to reduce the possibility of errors. Each screen includes on-screen instruction and a help button to open aid for the current step. The profiling technology driving SNAP is based on the well-established PhotoPRINT Color Profiler. Profiles created with SNAP follow the ICC standard and can be used with most major software applications.

ColorExcel™ color verification software uses a simplified interface to quickly compare colors and determine the deltaE between them. ColorExcel facilitates rapid color comparison of samples printed on different devices or different materials.

“We are eager to launch our new Color Solutions products this year,” states Don Feagan, President and COO, SAi. “It won’t be long before the color management industry is buzzing with excitement about each of our innovative new products.”

**About SA International:**

SAi is recognized as a global leader in providing complete, professional software solutions for the Sign Making, Digital Printing, Proofing, and CAD/CAM for CNC Machining Industries. The Company’s software solutions help turn creative ideas into reality by providing world-class design and editing tools geared for production. Headquartered in Philadelphia, Pennsylvania, SAi has additional offices in Belgium, Brazil, China, Japan, Germany, and Puerto Rico.
